

In the Claims

The status of claims in the case is as follows:

- 1 1. [Currently amended] Method for integrating forms
- 2 including fields defining the schema of a collaboration
- 3 space into said collaboration space, comprising the steps
- 4 of:
- 5 ~~preparing at a browser using a legacy editor creating a~~
- 6 form containing fields defining said schema and
- 7 hyperlinks that point to web pages;
- 8 saving said form to local storage at said browser;
- 9 dragging and dropping said form from local storage into
- 10 an upload control panel in a user interface to said
- 11 collaboration space; [[and]]
- 12 parsing said form to identify said fields and
- 13 incorporate them into said schema;
- 14 integrating said form into said collaboration space;
- 15 rendering said form to a user; and

LOT920000023US1

2

S/N 09/752,121

16 receiving said form from said user with new data
 17 content for said collaboration space.

1 2. [Canceled]

2 3. [Canceled]

3 4. [Canceled]

1 5. [Currently amended] The method of claim 1, said
 2 collaboration space being implemented within an object model
 3 ~~selectively including~~ consisting of place, room, folder,
 4 page, member, form, field, placetype, roomtype, skin, and
 5 placebot objects.

1 6. [Original] The method of claim 5, with said room
 2 object visible as a unique identifier in uniform resource
 3 locators (urls).

1 7. [Original] The method of claim 5, further comprising
 2 the step of using said field object to construct html
 3 formatted input fields in forms.

1 8. [Original] The method of claim 5, further comprising
 2 the step of defining said form object using said form

LOT920000023US1

3

S/N 09/752,121

3 including imported hyperlinks.

1 9. [Original] The method of claim 1, further comprising
2 the steps of:

3 parsing said form, finding linked files and processing
4 uniform resource locators to generate a form object;

5 saving to a page object said form, said linked files,
6 and said form object; and

7 displaying at said browser said page with said form
8 object in read mode and said form in edit mode.

1 10. [Original] The method of claim 1, further comprising
2 the steps of:

3 responsive to creation of a valid link to an image
4 within an html page or skin, creating a uniform
5 resource locator (url) by:

6 downloading said images into a local directory in
7 the same folder as said html page or skin; and

8 uploading said linked and download images from said

LOT920000023US1

4

S/N 09/752,121

9 local directory automatically when said page or skin is
10 uploaded.

1 11. [Currently amended] A method for incorporating a
2 hypertext markup language (html) form including fields
3 defining the schema of a collaboration space into a
4 collaboration space place for entry of data content into
5 said collaboration space, comprising the steps of:

6 creating a form containing html fields defining said
7 schema in html ~~separate from said place~~;

8 dragging and dropping said form into said place;

9 parsing said form to identify each html field and
10 process uniform resource locators and to incorporate
11 each said html field into said schema;

12 creating a field for each html tag; [[and]]

13 saving on a page said html in read mode and said form
14 in edit mode;

15 rendering said form in edit mode to a user; and

16 receiving said form from said user with new data

LOT920000023US1

5

S/N 09/752,121

17 content for said collaboration space.

1 12. [Currently amended] The method of claim 11, further
2 comprising the steps of:

3 downloading said html and linked images for loading to
4 client storage in its original form by

5
6 importing an original html file which contains an
7 image tag ~~and the~~ together with copies of related
8 image files into collaboration space;

9 parsing said original html file to find linked
10 images;

11 creating a modified html file by modifying said
12 image tag in said html file to refer to ~~the copy~~
13 said copies of the image file said related image
14 files attached to document on the server within
15 said collaboration space;

16 saving said original html file and said modified
17 html file on a collaboration space page object;
18 and

19 displaying said page object with said original

LOT920000023US1

6

S/N 09/752,121

20 html file in edit mode and said modified html file
21 in read mode.

1 13. [Canceled]

2 14. [Currently amended] System for creating and uploading
3 a form including fields defining the schema of a
4 collaboration space into a place in collaboration space,
5 comprising:

6 a hypertext markup language (html) editor for preparing
7 a document containing custom code as a manually created
8 html form including fields defining said schema with
9 all said custom code within a body tag of said
10 document;

11 a browser;

12 a window at said browser for providing a user interface
13 to said place, said user interface including an upload
14 control;

15 said upload control uploading said document to said
16 place upon said document being dragged and dropped into
17 said upload control;

LOT920000023US1

7

S/N 09/752,121

18 said place parsing said form to identify said fields
19 and incorporate them into said schema; and
20 said place rendering said form in edit mode to a user
21 and receiving said form from said user with new data
22 content for said collaboration space.

1 15. [Currently amended] A system for integrating forms
2 including fields defining the schema of a collaboration
3 space into collaboration space, comprising:

4 a client browser;

5 a legacy editor for preparing a form containing
6 hyperlinks that point to web pages and fields defining
7 said schema;

8 a local storage for saving said form at said browser;
9 and

10 an upload control panel receiving said form from said
11 local storage and uploading said form to said
12 collaboration space;

13 said collaboration space including a server for parsing
14 said form to identify said fields and incorporate them

LOT920000023US1

8

S/N 09/752,121

15 into said schema; and

16 said collaboration space rendering said form in edit
17 mode to a user and receiving said form from said user
18 with new data content for said collaboration space.

1 16. [Currently amended] A program storage device readable
2 by a machine, tangibly embodying a program of instructions
3 executable by a machine to perform method steps for
4 integrating forms including fields defining the schema of a
5 collaboration space into collaboration space, said method
6 steps comprising:

7 preparing at a browser using a legacy editor a form
8 containing hyperlinks that point to web pages and
9 fields defining said schema;

10 saving said form to local storage at said browser;

11 dragging and dropping said form from local storage into
12 an upload control panel in a user interface to said
13 collaboration space; [[and]]

14 parsing said form to identify said fields and
15 incorporate them into said schema; and

LOT920000023US1

9

S/N 09/752,121

16 said collaboration space rendering said form in edit
17 mode to a user; and receiving said form from said user
18 with new data content for said collaboration space.

1 17. [Currently amended] A program storage device readable
2 by a machine, tangibly embodying a program of instructions
3 executable by a machine to perform method steps for
4 incorporating a hypertext markup language (html) form
5 including fields defining the schema of a collaboration
6 space into a collaboration space place, said method steps
7 comprising:

8 creating a form including fields defining said schema
9 in html ~~separate from said place;~~

10 dragging and dropping said form into said place;

11 parsing said form to identify each html field and
12 process uniform resource locators and to incorporate
13 each said html field into said schema;

14 creating a field for each html tag; [[and]]

15 saving on a page said html in read mode and said form
16 in edit mode; and

LOT920000023US1

10

S/N 09/752,121

17 rendering said form in edit mode to a user; and
18 receiving said form from said user with new data
19 content for said collaboration space.

1 18. [Currently amended] A computer program product for
2 incorporating a hypertext markup language (html) form
3 including fields defining the schema of a collaboration
4 space into a collaboration space place, comprising:

5 a computer readable medium;

6 first program instructions for creating a form in html
7 ~~separate from said place~~ and including fields defining
8 said schema;

9 second program instructions for dragging and dropping
10 said form into said place;

11 third program instructions for parsing said form to
12 identify each html field and process uniform resource
13 locators and to incorporate each said html field into
14 said schema;

15 fourth program instructions for creating a field for
16 each html tag; and

LOT920000023US1

11

S/N 09/752,121

17 fifth program instructions for saving on a page said
18 html in read mode and said form in edit mode;

19 sixth program instructions for rendering said form in
20 edit mode to a user and receiving said form from said
21 user with new data content for said collaboration space
22 and wherein

23 said first, second, third, fourth, ~~and fifth~~ fifth and
24 sixth program instructions are recorded on said
25 computer readable medium.

1 19. [Currently amended] A computer program product for
2 integrating forms including fields defining the schema of a
3 collaboration space into said collaboration space
4 comprising:

5 a computer readable medium;

6 first program instructions for preparing at a browser
7 using a legacy editor a form including fields defining
8 said schema and containing hyperlinks that point to web
9 pages;

10 second program instructions for saving said form to
11 local storage at said browser; and

LOT920000023US1

12

S/N 09/752,121

12 third program instructions for dragging and dropping
13 said form from local storage into an upload control
14 panel in a user interface to said collaboration space;

15 fourth program instructions for parsing said form to
16 identify said fields and incorporate them into said
17 schema;

18 fifth program instructions for rendering said form in
19 edit mode to a user and receiving said form from said
20 user with new data content for said collaboration
21 space; and wherein

22 said first, second, third, and ~~fourth~~ fourth, and fifth
23 program instructions are recorded on said computer
24 readable medium.
